Senior iOS Developer · ahmed_tarek_2015@pem.helwan.edu.eg · darkahmed1990@gmail.com

An **iOS Developer** who loves stepping out of the comfort zone once in a while to improve, face new challenges, or just try new things. I hate boilerplate, and I love working on architecture topics and how challenging it is to apply such concepts in mobile development with different team sizes and requirements. I prefer working on a single product, being part of a long-term journey with a focused strategy. I had previous in objective c, react, PHP, NodeJS, Angular 2+ & Ionic Framework. I have good knowledge of designing UI and also a little knowledge Koltin, java, spring framework and good knowledge of designing UI.

SKILLS & ABILITIES

- Have a sold understood for SOLID principles.
- Have a sold understood for Application Architecture.
- Design and Development of iOS native client application.
- Knowledge of Apple's design principles and application interface guidelines.
- Developed an iOS Application with different selectable skins in a dynamic drawing threaded environment.
- Experience in developing and publishing iOS Application on Appstore.
